

MARK 1.22 AGL

Smallbore stock **MARK 1.22 AGL** inclusive of **FREE POSITION**, **FORE-END EXTENSION** and **SUPPORT RAIL**. Optimal butt design achieved through the multi-adjustable buttplate and the long, movable cheekpiece. The fore-end is extended about 15 cm and together with the support rail, comes an extremely long way forward. The support rail itself is absolutely level, adjustable in width and rotatable about the barrel axis. The special coating provides a good contact to the support itself. By removing the support rail and the extension piece, the stock can be built back to the normal smallbore version (MARK1 .22).

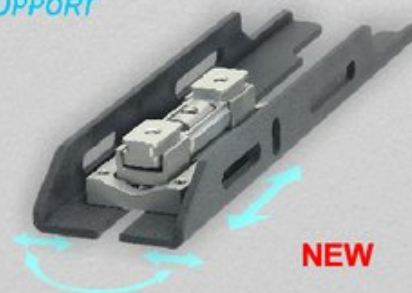

*Dieser Schaft liegt wie das berühmte Brett!*

The Hand-shelf of the MARK 1 or for all stocks with a profile rail. Adjustable for height or by sliding back and forth, rotatable about the long axis. In addition, both contact angles can be offset to the side, so that the contact surface can be adjusted for width and asymmetrically. With rough surface for better contact to the bar of the support.

*A further well-tested innovation, which has been developed through close involvement of the experts here in our business, and exhaustively tested. Can be fastened very flat under stocks from Walther and Anschütz (with profile rail).*

SUPPORT

NEW

MEC SUPPORT 179,- €

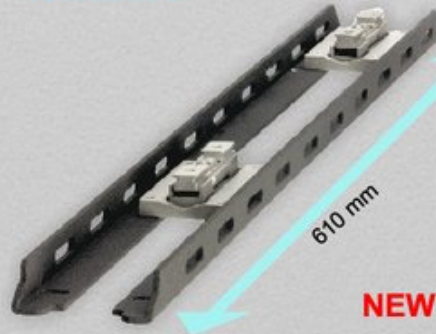

Adjustable Alu-Handshelf with 2 variable elements for stocks with profile rails.

Best. Nr.: 6600106

The support rail for the MARK 1. Maximum length, permitted width (6 centimetres) and flat build. The aluminium angles guarantee a level support and excellent friction because of the clever lacquer finish. The Katamaran can be adjusted for height and width and (for canting) permits rotation about the barrel axis.

Fits all rifles with flat fore-ends and profile rails.

KATAMARAN

610 mm

NEW

MEC KATAMARAN 299,- €

Adjustable Alu-rail with 2 variable elements for Mark 1. Length 610 mm, for other stocks by request.

6600112

CHAMPION

- Hand-shelf, adjustable in all dimensions.
- Rotates about the axis of the barrel.
- Wooden surface can be coated or shaped.

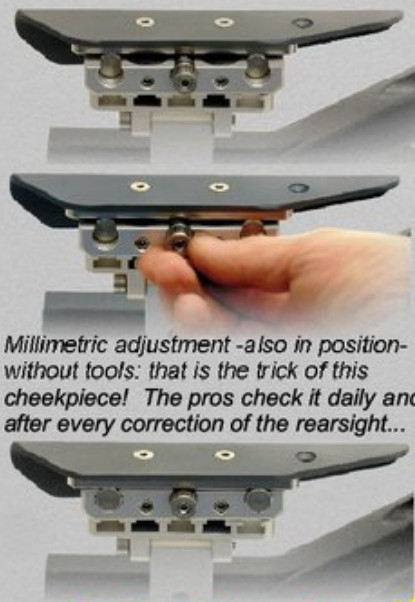

*Classic hand-shelf, fully adjustable, with wooden platform. Unique quality, can be independently adjusted in different dimensions. A splendid object!*

centra CHAMPION 226,- €

Variable hand-shelf with wooden platform.

Best. Nr.: 19930003

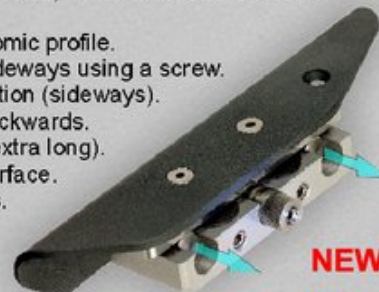

CHEEK

The adjustable aluminium cheekpiece of the MARK 1, with adaptors for fitting to Anschütz, Feinwerkbau and Walther smallbore and air rifles.

- Ergonomic form, ergonomic profile.
- Can be fine-adjusted sideways using a screw.
- Can be changed in position (sideways).
- Can be slid forwards/backwards.
- Version for supported (extra long).
- Skin-friendly anti-slip surface.
- Available for lefthanders.

*Millimetric adjustment - also in position - without tools: that is the trick of this cheekpiece! The pros check it daily and after every correction of the rearsight...*

NEW

centra CHEEK 225,- €

Variable aluminium cheek-piece with adaptor for

- Anschütz 19950003
- Feinwerkbau 19950003
- Walther 19950003
- Walther 'Carbontec' 19950004
- + Walther 'Protouch'.

*The placement of the head and the positioning of the eye in front of the iris opening are problematic for many. This fine-adjustable and well-formed cheekpiece solves such problems with delicacy. One turn of the adjusting wheel is enough to bring the head comfortably and precisely into position behind the rearsight.*
