

KAT 1/08

START-LINE Diopter

- Highly rigid aluminium, fits all rifles.
- Integrated anti-glare tube.
- 20 click, 0.2 mm at 10 metres.
- For juniors and club rifles.
- Uncompromising precision and function.

centra START-LINE
159,- €

High quality aluminium diopter.

Best. Nr.: 19010005

A substitute for dubious standard rearsights

OBSERVER

- Developed in Switzerland by P.-A. Dufaux and D. Burger, most especially for 300 metres.
- 10 mm sideways and 20 mm height adjustment.
- Zeroing feature.

centra OBSERVER
349,- €

Precision rearsight.

Best. Nr.: 19010010

Swiss precision robust enough for 300 metres.

BASE 10 - 50

A frontal view of the three diopters above.

- Precision rearsight for 10, 50 + 100 m.
- Cut fine-thread spindles.
 - Ideal for wind-observation.
 - Slidable scales.
 - 1 click = 0.25 mm at 10 metres.
- Affords an overview and peripheral vision!*

centra BASE 10 - 50
348,- €

Precision rearsight .
Best. Nr.:

19010001-F	ANSCHÜTZ
19010002-F	FEINWERK
19010003-F	WALTHER
19010031-F	REDFIELD

Locator-ring positioning

37,- €

Best. Nr.: 19920019

FRONT BASE LR

As for BASE LR, 1 min. per click, includes a positioning-ring.

centra FRONT BASE LR
278,- €

Height-adjustable foresight tunnel for long range.

M18	M22
19920018	19920022

Left thread Right thread

19010001	19010002	ANSCHÜTZ
19010011	19010012	WEAVER
19010021	19010022	PARAMOUNT
19010031	19010032	REDFIELD
19010041	19010042	CENTRAL

BASE LR (Long Range)

- Cut precision threads, ball bearings.
- Right- or left-threaded.
- Slidable scales.
- 1/4, 1/8, 1/12 minute clicks.

The state-of-the-art for long ranges.

centra BASE LR
348,- €

Precision rearsight for 'long-range' shooting.

FREE SIGHT

- extremely low, slim and compact.
 - allows vision over the housing, enables pre-aiming in the standing position.
 - gives free view of the wind-flags.
 - offers ca. 20 clicks within the air rifle 10-ring.
 - with tunnel-raiser and anti-glare tube, iris not included.
- Ideal for balanced standing, off-hand and supported.
Ideal for wind-shooting.

More and more standing shooters are discovering the advantages of the compact free-sight. The position wobbles less because of the all-round freedom of vision.

MEC FREE-SIGHT
489,- €

Precision sight, high quality, special design.

Best. Nr.:

MEC 270	ANSCHÜTZ
MEC 271	WALTHER
MEC 272	FEINWERK

EYE II

- Variable sight offset for foresight tunnel and rearsight.
- Rotatable, positioning rings for exact mounting.
- 245 grammes, for all makes of diopter and foresight tunnel.

centra EYE II
242,- €

Sight offset for opposite eye aiming.

Air-rifle (LG) Small Bore .22 (KK)

ANSCHÜTZ	19908010	19908110 + barrel	Ø
FEINWERK	19908011	19908111 + Lauf	- Ø
WALTHER	19908012	19908112 + Lauf	- Ø

If you have to aim with the left eye, you lose a lot of light and field of vision when using periscopes. Our offset sets the standard for those who want to be able to see without disturbance. Change over and see without hindrance again!
