**Sight 1.8 COMPETITION**

Polarisation filter in addition.  
*Outdoor an advantage to reduce reflexes and mirrage effects..*

**centra 1.8 COMPETITION** 156,- €

Iris unit, alu, 4 colours, 0.8 - 1.8 range. 10-colour filter and polarisation filter.

Best. Nr.: 19202001 + colour

0.8 - 1.8

**Sight 1.8 PERFORMANCE**

5 colour filters and polarisation in the iris, plus a polariser (M 18 or M22) for the foresight tunnel.  
*This combination has been developed for bright sight-pictures (e.g. MEYTON) in front of a dark background. The target can be darkened with this system, while the surroundings remain sufficiently bright. Under normal lighting conditions the filter in the tunnel would be screwed out.*

**centra 1.8 PERFORMANCE** 159,- €

Iris unit black, 0.8 - 1.8 range. 5-colour filter and polarisation filter for tunnel.

Best. Nr.: 19203001 M18  
19203002 M22

0.8 - 2.2

**Sight 1.8 TINY**

Slim build and halved cross-section.  
0.8 - 2.2 mm opening, 5 filter colours.  
*Compact iris-filter combination, specially designed for the MEC Diopter free-sight. Permits the widest possible field of vision. Good for the balance in the standing position and for reading the wind outdoors.*

**centra 1.8 TINY** 139,- €

Iris unit black, 0.8 - 2.2 range. 5-colour filter, specially for MEC 'FREE SIGHT'.

Best. Nr.: 19205001
