SCATT USB pro
4-10 metres, complete

Computer-controlled aiming path analysis (infra-red system) for almost all sporting rifles and pistols. For home training (dry) and live firing with airguns.

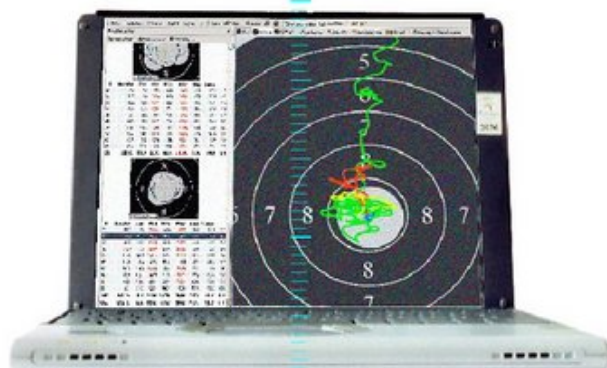

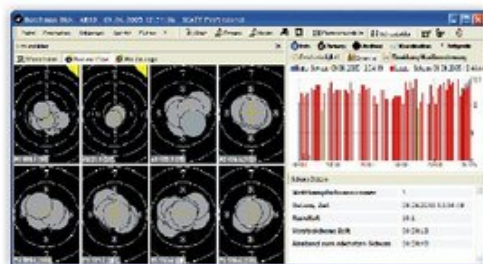

Included in the system are:

- Measuring frame with insert for air rifle targets.
- Connecting cable for the PC (also for the power supply).
- Processor with connecting cable.
- Sensor (only ca. 30 grammes) with connecting cable and 5 fixing bands for all barrel diameters..
- Programme on CD, handbook and installation instructions.

The best aiming path analysis method developed to meet professional needs:

- Exact measurement from 4 - 12 metres, easy to use.
- Clear menu structure, easy calibration.
- USB connection.
- Menu-driven through Windows, wide-ranging data processing und storage.
- Programmes for all ISSF competitions, rifle, pistol, and archery.
- Multiple analysis features, online help and updates.
- For publicity work.
- For all competition classes.
- For professional training.

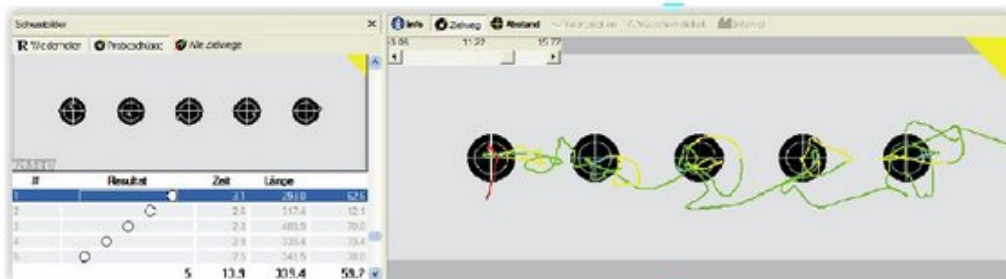

**SCATT
USB BIATHLON****MEC SCATT USB BIATHLON****1170,- €**

Best. Nr.: 630

SCATT USB pro Biathlon.
Complete system as above,
but with 5-shot aiming marks
instead of the precision frame.

National teams, beginners and improvers all train with SCATT USB Biathlon. 5 shots with aiming path, 'sound' and further details concerning hold, aim and release can be recorded/displayed.

In the club or in the garden at home, you can realistically and precisely rehearse the many fine points of sequential shooting at falling-plate targets. Guaranteed fun for all who want to have a go, but also an unforgiving training partner for the best professionals.

The 5-shot frame on its own, as an extra to an existing SCATT USB professional. Can be simply connected and driven with the standard software.

**SCATT
USB BIATHLON-Target**

Biathlon is in trend, who wouldn't want to learn how to flatten 5 targets in double-quick time? A blessing for youth leaders, club presentations, children's birthdays and christmas shoots. In combination, for example, with our self-loading SCATT-rifle (see next page).
