

IN THE DECISIVE MOMENT
SHOOTERS HAVE TRUSTED CENTRA FOR 50 YEARS

centra

For half a century, **Centra** has manufactured high-quality accessories, especially sight systems, for the shooting sports.

The firm was founded in 1958 by Helmut Brunner sen., who has been responsible for thinking out and developing many innovations.

The firm headquarters is Rheinfelden in Südbaden, near the Swiss border, where there is a tradition of groundbreaking fine mechanical product development and manufacturing.

Innovation and marketing are meanwhile in the hands of Johann Zähringer, Diplom.-Ing. and internationally renowned rifle shooter. Tabitha Baltensperger, the daughter of the founder, is the responsible managing director.

Centra sight systems and accessories are manufactured 100 % in-house, assembled and marketed worldwide. The work involves the use of diverse materials such as steel, stainless steel, brass, aluminium, glass, plastics and wood, and much of this work is still done by hand. Sight systems are our special area. We manufacture most components, from rearsight to foresight, in high precision and carefully matched to each other.

If you have special wishes, repairs, cleaning or you need custom-made components, then please talk directly with our service team.

Our speciality is fast and precise solutions, new ideas are our passion.

For your **centra** team,

Tabitha Baltensperger and Johann Zähringer
